

PRESS RELEASE

House Of Diagnostics becomes Delhi's First Private Laboratory with VITROS Automation Solution

Highlights

- ❖ Dry Chemistry based Total Lab Automation
- ❖ Hands free sample transfer between equipment
- ❖ Automated analyzers ensures accuracy reliability in blood testing

Delhi, October 22, 2021: Understanding the importance of Laboratory Automation, HOD, a leading name in the field of diagnostics and pathology, has launched automated solutions at its central laboratory in Karkardooma, New Delhi. With this, HOD has become the first private player in the diagnostics sector in Delhi to launch this facility. VITROS Automation Solutions is a flexible and scalable solution that helps streamline and standardize laboratory workflow while enhancing throughput. The new technology allows the company to conduct hands-free sample transfer between equipment with higher accuracy and reliability.

On it's inauguration, **Dr Shubham Sogani, CEO of House of Diagnostics**, said,

"The state-of-the-art technology with global quality standards enables hands-free sample transfer that improves the accuracy and reliability of tests and provides faster turnaround time (TAT) in lab operations."

The automation system is equipped with state-of-the-art technology to analyze the tests at a much faster speed, thus improving the outcome. It makes handling larger and complex tasks – including sample handling to microplate handling – much easier and smoother. The automated lab system helps decap, sort sample tubes based on reagent and throughput availability, thus reducing turnaround time for the samples. The system is also integrated with the lab's LIS, allowing the staff to accurately monitor the status of all the samples. Another major benefit of automation is that it further reduces the chance of human errors, ensuring a higher quality of service to thousands of patients per day.

HOD believes in the philosophy of providing reliable and value-priced healthcare to all its patients. By performing a large number of tests and in a shorter duration, the cost saved is passed onto the customers.

About HOD

HOD is a young, dynamic, and rapidly growing integrated medical diagnostic service provider, making a positive impact in India's healthcare sector. With a vision to be a pan-India healthcare player, the company is currently managing its operations in Delhi-NCR, with plans to expand rapidly in other parts of the country. HOD has 10 Integrated Service Centres providing radiology, pathology and nuclear medicine services, and a footprint spanning over 100+ blood collection centres across the national capital region. HOD is committed to service people with reliable and quality diagnostic and pathology services using the latest state-of-the-art technology supported by strict internal and external quality assessments and controls.
