

HOD Expands to Mumbai with New Integrated Diagnostic Centre in Borivali

Highlights

- ❖ HOD's First Integrated Centre in Mumbai's Western Suburbs
- ❖ Advanced Radiology & Pathology Services Under One Roof

Mumbai, August 1, 2026: House of Diagnostics (HOD), a pioneer in the field of diagnostics and pathology, has expanded its presence to Mumbai with the opening of a new [Integrated Diagnostic Centre in Borivali](#). The launch marks an important milestone in the organisation's expansion and strengthens its commitment to delivering advanced, technology-enabled and patient-focused diagnostic services.

Located in Borivali, the new facility brings a broad spectrum of radiology and pathology services closer to residents of the Mumbai's western suburbs and surrounding areas. The centre is equipped with advanced diagnostic infrastructure, including Digital 3T MRI, 160-Slice CT, Cardiac CT, Digital PET-CT, True DR X-Ray, Echocardiography, Ultrasound, Colour Doppler, Blood Tests and Health Packages.

The Mumbai expansion is part of HOD's broader growth strategy to take its integrated diagnostic model to more cities across India. With several diagnostic services available at one centre, the facility is designed to provide patients with a more convenient and streamlined healthcare experience.

Speaking at the launch, Dr. Shubham Sogani, CEO, House of Diagnostics, said, "The launch of our Borivali centre marks a significant new chapter in HOD's growth story. As we enter Mumbai, our aim is to bring advanced diagnostic capabilities and our technology-driven approach closer to patients across the region. We are committed to making quality diagnostics more accessible and convenient while upholding the highest standards of accuracy and patient care. Borivali is the first step in our Mumbai journey, and we look forward to expanding our presence and serving more communities across the city."

The Borivali centre offers a diverse portfolio of diagnostic capabilities, including Digital 3T MRI and 160-Slice CT for advanced imaging, Cardiac CT and Digital PET-CT for specialised investigations, along with True DR X-Ray, Ultrasound, Echocardiography, Colour Doppler and Pathology services.

Designed with patient convenience at its core, the centre enables patients to access multiple diagnostic services at a single location. HOD's technology-led approach focuses on accuracy, standardisation and efficient workflows, supporting reliable diagnostic outcomes and improved turnaround times.

Labham Sogani, Chief Technical Officer, House of Diagnostics, said, “Mumbai represents an exciting opportunity for HOD to extend the capabilities and service standards we have built over the years. At Borivali, we have brought together advanced equipment, structured processes and multiple diagnostic disciplines to create a facility that is both comprehensive and convenient. This centre gives us a strong foundation as we build our presence in Mumbai and work towards reaching more patients across the city.”

The Borivali facility is an important step in HOD’s vision of building a pan-India healthcare and diagnostics network. The organisation intends to expand into additional key markets, taking advanced diagnostic infrastructure and integrated healthcare services to a wider patient base.

About HOD

House of Diagnostics is a fast-growing, technology-driven integrated medical diagnostic service provider, making a positive impact in India’s healthcare sector. With a vision to be a pan-India healthcare player, the company is rapidly expanding into other parts of the country. HOD currently operates 14 Integrated Service Centres offering radiology, pathology and nuclear medicine services, with a footprint spanning over 200+ blood collection centres across the national capital region. HOD is committed to serving people with reliable and quality diagnostic and pathology services using the latest state-of-the-art technology supported by strict internal and external quality assessments and controls.
