

HOD launches cutting-edge Integrated Centre in Dwarka

Highlights

- ❖ 11th Integrated Centre in Delhi-NCR
- ❖ Comprehensive radiology and pathology services under one roof

December 10, 2024, Delhi: As part of its aggressive expansion plan, House of Diagnostics (HOD), a renowned name in the field of diagnostics and pathology, has opened a new Integrated Centre in Sector 12B, Dwarka. The new Dwarka centre is operational and offers a comprehensive range of services — including high-end MRI, ultra-low dose CT, mammography, DEXA, X-ray, ultrasound, and blood testing, alongside specialised cardiology and neurology tests.

Speaking at the inauguration of the new centre, **Dr Shubham Sogani, CEO of House of Diagnostics**, said, “With this launch, residents of Southwest Delhi and the wider NCR gain seamless access to precision diagnostics and extensive pathology services. Our Dwarka centre reflects our vision of delivering high-quality, technology-driven healthcare solutions across the nation. Staffed with expert pathologists, skilled technicians, and dedicated doctors, the centre ensures that every report is accurate, reliable, and timely.”

[HOD's Dwarka centre](#) brings together cutting-edge medical imaging and a pathology lab under one roof. Patients have access to advanced diagnostic services, including high-resolution MRI, ultra-low dose CT scans, echocardiography, mammography, uroflowmetry, plus a variety of blood tests and customised health packages designed to meet the needs of every age group. The new facility is strategically located, ensuring easy access to residents of Dwarka and Delhi-NCR.

“In West Delhi, we now offer two Integrated Centres along with more than 15 blood testing locations. This latest facility brings together advanced diagnostic, pathology, and nuclear medicine offerings from a single location and serves as a testament to our investment in service of the community and patient-first care,” said **Labham Sogani, Chief Technical Officer at House of Diagnostics**.

At the Dwarka centre, like other centres, we follow a strict quality system to ensure that there is compliance with standard processes. Safe diagnostic and collection practices are ensured for quick, reliable, accurate and consistent results for all the patients.
