

## **HOD Strengthens South Delhi Reach with New Lajpat Nagar Centre**

### **Highlights**

- ❖ Equipped with North India's first uCT 960+ scanner with One-Beat Cardiac CT
- ❖ Comprehensive cardiac, neurological and diagnostic services under one roof

**September 1, 2026 – New Delhi:** House of Diagnostics (HOD), a leading name in diagnostics and pathology sector, has further expanded its presence in Delhi with the launch of a new Integrated [Diagnostic Centre in Lajpat Nagar](#). The new facility brings together advanced imaging, cardiac, neurological and diagnostic services under one roof, reinforcing HOD's commitment to making comprehensive and technology-driven healthcare more accessible to patients across South Delhi.

Strategically located in Lajpat Nagar, the new facility is designed to cater to patients across South Delhi and surrounding areas. Equipped with advanced technology and specialised diagnostic infrastructure, the centre brings together a wide range of investigations, supporting greater accessibility, operational efficiency and a more convenient patient experience.

A key highlight of the centre is its One-Beat Cardiac CT, which is North India's first uCT 960+ scanner. The 640-slice system features a 16 cm detector and a rotation speed of 0.25 seconds, enabling an acquisition capability of up to 2,560 slices per second. Designed for advanced cardiac imaging, the system supports single-beat acquisition and high-quality imaging even at elevated heart rates. It can also support imaging in patients with arrhythmias and paediatric cases and may reduce the need for beta-blocker preparation in appropriate cases.

Complementing its advanced cardiac imaging capabilities, the Lajpat Nagar centre offers an extensive range of diagnostic services, including Digital 3T MRI, Digital X-Ray, Mammography, DEXA Scan, Echocardiography, TMT, EEG, EMG, NCV, Uroflowmetry and Blood Collection. By bringing multiple diagnostic disciplines together, the centre enables patients to access a broad spectrum of investigations at a single location.

Speaking at the launch, Dr. Shubham Sogani, CEO, House of Diagnostics, said, "At HOD, our aim is to make state-of-the-art diagnostic services more accessible to people across the country. The launch of our Lajpat Nagar centre reflects our commitment to bringing advanced technology and comprehensive diagnostic capabilities closer to patients. As we expand our network, we remain focused on delivering reliable, efficient and patient-centric healthcare while maintaining high standards of quality and accuracy."

“With this new facility, we aim to establish an environment that combines technology with operational efficiency. The centre adds to HOD’s capabilities in Delhi and strengthens our ability to serve patients with a comprehensive diagnostic offering,” said Labham Sogani, Chief Technical Officer, House of Diagnostics.

HOD maintains standardised quality and safety protocols across its network to support accurate and dependable diagnostic outcomes. The Lajpat Nagar centre follows these established practices across its diagnostic procedures and sample collection services, with a continued focus on patient safety, service quality and operational consistency.

The launch of the Lajpat Nagar centre is part of HOD’s wider expansion strategy to strengthen its presence across key markets and build an integrated diagnostics network that brings advanced healthcare services closer to patients across India.

### About HOD

House of Diagnostics is a fast-growing, technology-driven diagnostic service provider transforming healthcare access across India. A B2C-focused integrated diagnostics platform, HOD offers pathology, radiology, and nuclear medicine services through a network of 14 Integrated Centres and over 200 collection centres across Delhi-NCR and Mumbai. Driven by innovation, operational efficiency, and patient trust, HOD has built strong consumer recall and high repeat usage, and is steadily expanding towards becoming a pan-India leader in diagnostics and pathology services.
