

Patient Name : Demo Patient Name
Age / Sex : 66 Y / M
Referred By : DEMO HOSPITAL
Centre : HOD Head Office

Lab No : Demo Visit No
Registration On : 21-Jan-25 21:03
Patient ID : UHID.DEMO.001

PT - Prothrombin Time			Sodium Citrate 3.2% Sample	
Accession No: DEMO_BARCODE		Collected On: 21-Jan-25 21:03	Received On: 21-Jan-25 21:26	Approved On: 21-Jan-25 21:47
Observation	Result	Unit	Biological Ref. Interval	Method
PT Test	97.9	Seconds	9.4-13.0	Optical Method
INR	8.55	Ratio	0.84-1.26	Calculated
Mean Normal Prothrombin Time (MNPT)	11.2	Seconds		Calculated

Kindly Correlate clinically and follow up with fresh sample.

Clinical Significance of Prothrombin Time (PT):

Prothrombin time (PT) is a marker of liver synthetic function. It measures time to clot after exposure of plasma to tissue factor. Prothrombin time is a measure of the activity of factors II, V, VII and X, all of which are synthesized in the liver. These factors are also dependent on vitamin K for synthesis. Levels of PT are increased in severe and long standing liver disease despite adequate stores of Vitamin K.

Remarks: Please correlate with clinical conditions.

This is a Demo Signature
