

Patient Name : Demo Patient Name
Age / Sex : 38 Y / M
Referred By : DEMO HOSPITAL
Centre : HOD Head Office

Lab No : Demo Visit No
Registration On : 21-Jan-25 18:35
Patient ID : UHID.DEMO.001

VDRL (RPR)				Serum Sample
Accession No: DEMO_BARCODE		Collected On: 21-Jan-25 18:35	Received On: 21-Jan-25 19:19	Approved On: 21-Jan-25 21:06
Observation	Result	Unit	Biological Ref. Interval	Method
RPR/VDRL	Negative			Rapid chromatography

Clinical Notes:
* Limitations: The Syphilis rapid test is for in vitro diagnostic use only. The test should be used for the detection of TP antibodies in serum / plasma / whole blood specimens only. Neither the quantitative value nor the rate of the increase in TP antibodies can be determined by this qualitative test.
* The rapid test will only indicate the presence of TP antibodies in the specimen and should not be used as the sole criteria for the diagnosis of TP infection
* As with all diagnostic tests, all results must be interpreted together with other clinical information available to the physician
* If the test result is negative and clinical symptoms persist, additional testing using other clinical methods is recommended. A negative result doesn't at any time preclude the possibility of TP infection
* Treponema Pallidum Hemagglutination Test result is recommended to be further confirmed by ELISA.
Please correlate results clinically.

This is a Demo Signature
and the doctor's signature should appear here

In case of any unexpected or alarming results, please contact us immediately for re-confirmation, clarifications, and rectifications, if needed.
