Tissue Transglutaminase Antibody IgA

Serum Sample

Accession No: DEMO_BARCODE **Collected On:** 21-Jan-25 13:50 **Received On:** 21-Jan-25 18:51 **Approved On:** 21-Jan-25 20:13

Observation	Result	Unit	Biological Ref. Interval	Method
Tissue Transglutaminase Antibody IgA	< 1.9	CU	<20:Negative 20-30:Weak Positive >30:Positive	CLIA

Clinical Significance :

The identification of tissue transglutaminase (tTG) as the major target antigen of EMA provided the opportunity of a more easy and reliable diagnosis of celiac disease. tTG is an enzyme that upon wounding is released from cells where it is thought to aid in tissue repair. Anti-tTG antibodies show higher sensitivity and specificity than anti-Gliadin antibodies. Furthermore they correlate tightly with the activity of the disease and thus are especially useful for diet monitoring.

Please correlate results with clinical conditions.
