CA 15.3

Serum Sample

Accession No: DEMO_BARCODE **Collected On:** 19-Jan-25 08:00 **Received On:** 19-Jan-25 11:57 **Approved On:** 19-Jan-25 17:00

Observation	Result	Unit	Biological Ref. Interval	Method
CA 15.3	17.2	U/mL	0.00 - 35.00	CLIA

Clinical Significance:

- CA 15.3 levels are most useful in following the course of treatment in cases of diagnosed breast cancer, especially advanced breast carcinoma.
- Rarely increased in early stage of breast cancer, therefore not recommended for screening of breast cancer.
- Serial concentrations of CA15.3 when elevated may reflect tumour size and grade.

Clinical Utility:

- Predicting early recurrence in treated breast cancer cases
- Serial testing in prior stage II/ III breast cancer cases who are clinically free of disease.
- Increased Levels seen in :
 - Advanced breast cancers.
 - Other cancers like that of ovaries, uterus, lung, colorectal prostate and pancreas.
 - Non malignant conditions - benign breast or ovarian diseases, endometriosis, pelvic inflammatory disease, hepatitis, cirrhosis and autoimmune disorders.

Please correlate results with clinical conditions.

This is a Demo Signature
and the doctor's signature should appear here

In case of any unexpected or alarming results, please contact us immediately for re-confirmation, clarifications, and rectifications, if needed.
