

Patient Name : Demo Patient Name
Age / Sex : 87 Y / F
Referred By : DEMO HOSPITAL
Centre : HOD Head Office

Lab No : Demo Visit No
Registration On : 20-Jan-25 10:27
Patient ID : UHID.DEMO.001

C3 Complement Component

Serum Sample

Accession No: DEMO_BARCODE Collected On: 20-Jan-25 10:27 Received On: 20-Jan-25 13:53 Approved On: 20-Jan-25 17:35

Observation	Result	Unit	Biological Ref. Interval	Method
Complement C3	115	mg/dL	88-165	Immunoturbidimetric

Clinical Significance:

The classic and alternative complement pathways converge at the C3 step in the complement cascade. Low levels indicate activation by one or both pathways. Complement C3 levels may be useful in following the activity of immune complex diseases as most of them show decreased C3 levels. CH50 is considered the best test to detect inherited deficiencies.

Increased in - many inflammatory conditions as an acute-phase reactant, active phase of rheumatic diseases (eg, rheumatoid arthritis, SLE), acute viral hepatitis, myocardial infarction, cancer, diabetes mellitus, pregnancy, sarcoidosis, amyloidosis, thyroiditis.

Decreased by - decreased synthesis (protein malnutrition, congenital deficiency, severe liver disease), increased catabolism (immune complex disease, membranoproliferative glomerulonephritis [75%], SLE, SjAgren syndrome, rheumatoid arthritis, DIC, paroxysmal nocturnal hemoglobinuria, autoimmune hemolytic anemia, gram-negative bacteremia), increased loss (burns, gastroenteropathies)

Sample Type: Serum

Technology: VITROS MicroTip, MicroSensor & Intellichcek

Analyzer: Fully Automated Biochemistry and Immunology Analyzer : VITROS 5600

Advise: Please correlate results with clinical conditions

This is a Demo Signature
and the doctor's signature should appear here

In case of any unexpected or alarming results, please contact us immediately for re-confirmation, clarifications, and rectifications, if needed.
